

Multi-model AMICA (n_models=2): pamica vs Fortran ensembles, real sample EEG

Vertical lines mark each distribution's mean, in its line style.

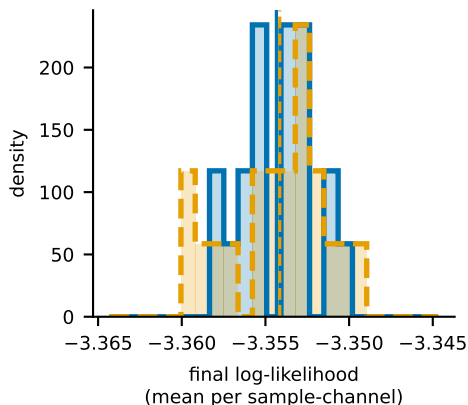

A Partition-agreement distributions

within-Fortran
within-pamica
between (pamica-Fortran)

mean corr. (run pairs)
within-Fortran: 0.626 (n=190)
within-pamica: 0.638 (n=190)
between: 0.632 (n=400)
diff: +0.006 (margin +/-0.05)
perm. p=0.88

B Likelihood distributions

Fortran
pamica

mean final LL
Fortran: -3.3543 (sd 0.002)
pamica: -3.3541 (sd 0.003)
gap: 0.0002 (100-iter budget)
KS p=0.83
